THE KARMA KEBAB PAPER

"When the legendary Lowlands festival asks you to develop a late-night snack, you do it. And then the rollercoaster begins..."

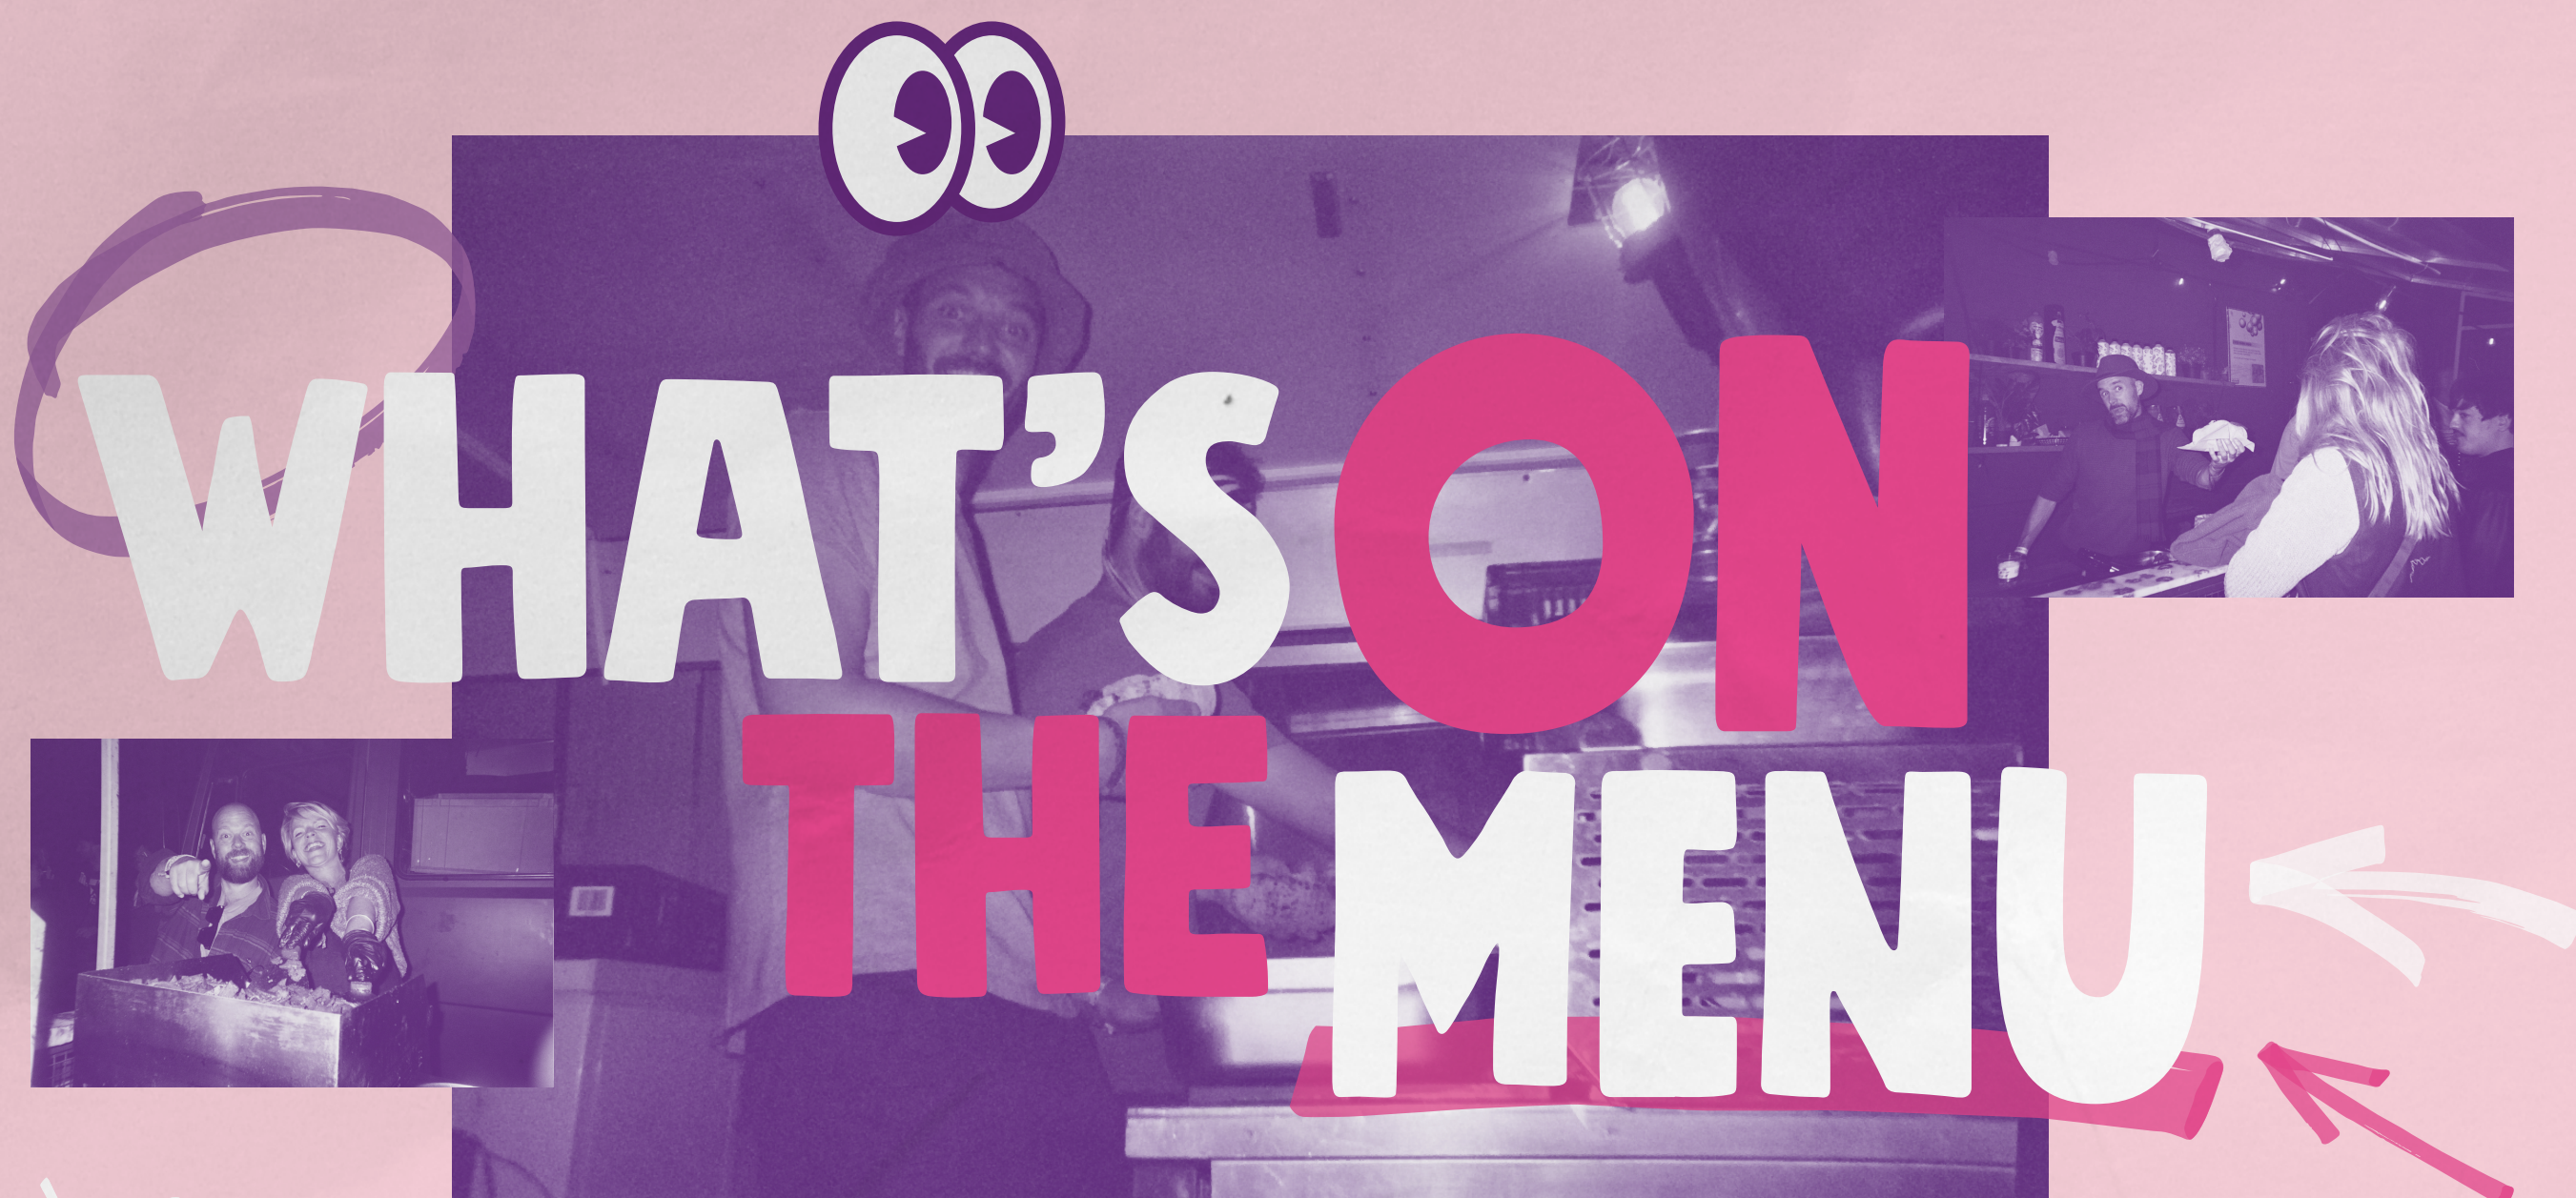

BORN ON THE FESTIVAL GROUND.

"What started as a rebellious brainfart on the sacred ground of festivals has now become indispensable. We now race with 9 food trucks to the biggest festivals in Europe, have opened a flagship store in Utrecht, and you can find us at the restaurant on the corner."

"Karma Kebab. Locally produced, super sustainable kebab made from celeriac. Fresh pita around it, unparalleled garlic sauce over it, job done! This way, we showed rows of hungry festival-goers how delicious plant-based kebab can be. So, it's time to conquer the rest of the Netherlands. Because together, we can eat our way to a better world."
